

Volador VX3.5 Custom

3.5 inch first person view quadcopter · custom assembled

AIRFRAME SERIAL
D93VXW2332

Marked on underside of frame

OPERATOR	CATEGORY	TAKEOFF WEIGHT	DOCUMENT DATE
[Your full name]	Small UAS · recreational	0.35 kg	11 / 06 / 2026

AIRCRAFT IDENTIFICATION

Type	Multicopter (quadcopter)
Configuration	Quad X, custom build
Airframe make	FlyFishRC
Airframe model	Volador VX3.5
Manufacturer ref	flyfish-rc.com
Serial number	D93VXW2332

AIRFRAME & STRUCTURE

Frame material	Carbon fibre, squashed X
Wheelbase	160 mm
Overall size	127.5 mm × 148 mm
Frame weight (bare)	70.5 g
Arm protection	TPU motor guards

PROPULSION

Motors	1804 brushless × 4 (RaceDayQuads Flash)
Propellers	3.5 inch, tri blade
ESC	4 in 1, integrated in stack

AVIONICS & CONTROL

Stack	SpeedyBee style mini flight stack
Flight controller	F4 class, Betaflight
Control link	2.4 GHz, line of sight
Failsafe	Motors off on signal loss

VIDEO & PAYLOAD

FPV video	Analog VTX, 5.8 GHz, with antenna
Onboard camera	BetaFPV × Insta360 action camera
Use	Recreational FPV / aerial footage

POWER

Battery	Lithium polymer, 4S, 850 mAh
Connector	XT60
Charging	Balanced LiPo charger

OPERATING PARAMETERS

Max speed (approx)	~110 km/h
Endurance (approx)	4 to 6 minutes
Max altitude	120 m AGL (per GACA limit)
Operation	Visual line of sight, daylight

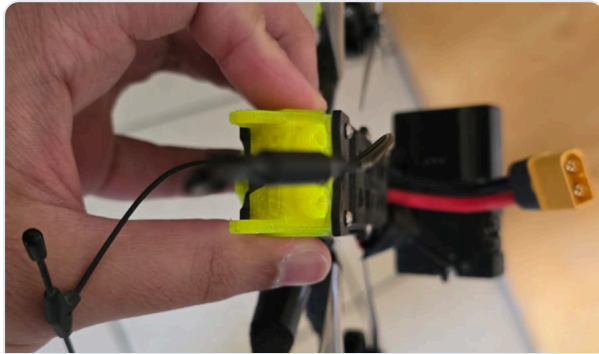

PHOTOGRAPHIC RECORD

Front · camera and power lead

Underside · serial D93VXW2332

Side · arm and motor detail

Side · stack and antenna

This unmanned aircraft was assembled by the operator from commercially available components, using the FlyFishRC Volador VX3.5 as the airframe. As it was custom built rather than supplied as a finished product, the serial number above was applied to the airframe by the operator and is used for registration and identification. All details on this sheet reflect the actual aircraft and are accurate to the best of the operator's knowledge.
